Feb. 15.—March cotton seed oil came out freely, and this had a tendency to check bullish operations in other months. A great many invest tors have changed from March to May. The public is not committed to the market. Crude remains quiet. In Texas business is reported at 80½c. The advance in lard had a steady influence. Faits and oils are kulet and firm. Glycerine remains strong under a god export inquiry, but scarcity of occas tonnage is preventing shipments.
